Housing* is considered
"affordable" when it
**costs no more than
30% of a household's
gross income.**

*Housing costs = rent + utilities or mortgage + taxes + utilities.

In 2021, the Ann Arbor
median family income is
\$106,600/year

**But half of the families in Ann Arbor
don't earn that much money.**

- People liked wider sidewalks, mid-block speed table/crosswalks, and gateway treatments
- Make street comfortable, safe, and legible for all ages and abilities
- Focus street design on transit use, (but it would be great if bikes were provided for also!)
- Extend the project area to include ideas such as a green wall on the deck, and pedestrian connection across 5th
- Keep pursuing opportunities to expand capacity

4TH AVE PROJECT

HOUSING NEEDS ASSESSMENT

- There is a significant need for affordable housing as shown by the demand break-down:
 - Demand for **1,346-1,407 units at < 30% AMI**
 - Demand for **782-856 units at 31% to 60% AMI**
 - Demand for **371-491 units at 61% to 100% AMI**
- Without the city getting involved and building affordable housing at or below 60% AMI, private developers will continue to build downtown residential at market rate. **Therefore, the market will drive growth in higher-income households.**
- While most downtown renter household growth is projected to occur among higher income households, low-income households comprise the largest share of renter households.
- One way to close the gap is for the **city to take an active role in building affordable housing downtown.**
- Based on this analysis, **all seven sites are marketable for affordable residential development.**

Housing Affordability Remains a Challenge for Many Area Renters

A total of 1,893 (55.5%) of all Downtown renters are considered “housing cost burdened,” meaning they pay over 30% of their income toward housing.
